IT consulting tailored to your goals

CONSULTING

At SATIC we integrate the layers that critical projects rarely deliver together. Twenty years deploying technology in sectors where availability and security leave no room to improvise. No shortcuts, no subcontracting what's critical, and a single point of contact.

What follows is the operational detail of this service: what it covers, how we deliver it, and why our way of working it is different. If something doesn't fit your case, we adapt it. If what you need doesn't exist on the market, we build it.

Three pillars for a solid IT strategy

CONSULTING AREAS

01

Technology consulting

Advice on how to use IT to achieve business goals with proven solutions.

- IT platform management
- Systems integration
- Consolidation and virtualization

02

Information security

Preventive and reactive measures to safeguard and protect information while maintaining CIA.

- Risk analysis
- VPNs and perimeter security
- Secure remote access

03

Strategy and transformation

Design of the technology roadmap aligned with the business's short- and long-term goals.

- Assessment and digital maturity
- Prioritized IT roadmap
- Transformation plan

Everything that goes into an IT consulting engagement

SERVICES INCLUDED

01**IT platform management**

Comprehensive operation and maintenance of the technology estate.

02**Systems integration**

We connect heterogeneous applications, data, and processes.

03**Consolidation and virtualization**

We optimize servers and workstations to reduce CAPEX/OPEX.
