Your IT department, managed

MANAGED SERVICES

At SATIC we integrate the layers that critical projects rarely deliver together. Twenty years deploying technology in sectors where availability and security leave no room to improvise. No shortcuts, no subcontracting what's critical, and a single point of contact.

What follows is the operational detail of this service: what it covers, how we deliver it, and why our way of working it is different. If something doesn't fit your case, we adapt it. If what you need doesn't exist on the market, we build it.

Benefits of managed services

WHAT YOU GET

01

Outsourcing

By outsourcing these activities, the company can focus more easily on its business strategy.

02

Cost reduction

It reduces the operating and infrastructure costs that an in-house IT department requires.

03

Availability

It ensures the availability of the platforms that depend on IT and better serves the areas that rely on them.

04

Adaptability and scalability

We work with the most innovative technologies, and the solution grows with you when expansion is needed.

Five phases for a service that performs
