Connectivity without compromise

TELECOMMUNICATIONS

At SATIC we integrate the layers that critical projects rarely deliver together. Twenty years deploying technology in sectors where availability and security leave no room to improvise. No shortcuts, no subcontracting what's critical, and a single point of contact.

What follows is the operational detail of this service: what it covers, how we deliver it, and why our way of working it is different. If something doesn't fit your case, we adapt it. If what you need doesn't exist on the market, we build it.

Three fronts to connect your business

AREAS

01

Fiber optics

Deployment over large areas guaranteeing bandwidth, low latency, and high power.

- FTTH, FTTO, and indoor plant
- Splicing and OTDR certification
- Metro and long-haul backbone

02

Broadband and 5G

Next-generation networks with fast and ultra-fast connections that enable IoT, AI, and Big Data.

- High-capacity mobile and fixed access
- Microwave and radio links
- Corporate and campus Wi-Fi

03

Telephony and VoIP

- IP-PBX systems and SIP trunking
- Mobility and softphones
- Integration with CRM and contact center

Eight fronts for a network without surprises

SERVICES INCLUDED

01

FTTH / FTTO

Fiber deployment to homes and offices with an optimized last mile.

02

Enterprise broadband

Symmetric connectivity with SLA, static IP, and premium support.

03

VoIP / IP-PBX

IP PBXs, terminals, and managed SIP services.

04

Corporate Wi-Fi

Wi-Fi 6/6E campus design with roaming and captive portal.

05

Microwave / Radio link

Point-to-point and point-to-multipoint links in licensed and unlicensed bands.

06

MAN/WAN backhaul

Aggregated transport for sites with SD-WAN and redundant routes.

07

Structured cabling

Category 6A/7 and indoor-plant fiber certified to standard.

08

Outside plant

Maintenance of ducts, handholes, and splicing 24/7.

Five phases until the network performs
