Who comes in, who goes out, where every person and vehicle is.

Active personnel identification indoors, automatic license-plate reading outdoors, real-time location, and full traceability. Available instantly in case of an incident or an audit.

At SATIC we integrate the layers that critical projects rarely deliver together. Twenty years deploying technology in sectors where availability and security leave no room to improvise. No shortcuts, no subcontracting what's critical, and a single point of contact.

This catalog lays out how we approach this solution: what gets deployed, how we deliver it, and where it adds real value. If something doesn't fit your case, we adapt it.

What gets deployed to know who and where.

01

Active personnel identification

Active personnel identification Cards or tags with multi-year battery life, reads at every entry point and inside critical zones.

02

Automatic license-plate reading

Automatic license-plate reading LPR cameras at entrances, dynamic whitelist/blacklist, integration with barriers and turnstiles.

03

Indoor location

Indoor location Real-time occupancy, position by zone, immediate evacuation roster.

04

Geofences and rules

Geofences and rules Events on entering or leaving restricted zones, alerts configurable by shift.

05

Visitor management

Visitor management Pre-registration, document control, full entry-exit traceability.

06

Traceability and auditing

Traceability and auditing A queryable history, export to PDF/CSV, integration with our own platform.

How we deploy identification and location.

From the first survey to registering the last visitor.

Where knowing who and where makes the difference.

Scenarios where the real-time roster isn't optional.

01**Personnel count by shift**

Active identification of every worker, listed by section and gallery, available at the surface instantly. Compliance with mining regulations.

02**Occupancy control at portals and galleries**

License-plate reading, active identification of crews, a verifiable roster in case of an incident or audit.

03**Plant access control**

Access by zone, anti-passback, integration with HR. Pre-registered visitors with full traceability.

04**Visitor management and multi-level access**

Discreet identification, immediate evacuation roster, integration with video and security procedures.

05 · NEXT STEP

Do you know who's inside and where they are, right now?

We design the identification architecture your operation needs: indoors and out.
